YUCCA GLAUCA

(Small Spanish Bayonet) Montana 1946 crop
c.s. per ounce50

QUARTER OR HALF POUND LOTS

AT POUND RATE. OUNCE LOTS

10% OF POUND RATE.

DOUGLAS FIR

Our hardy Douglas fir (*Pseudotsuga taxifolia glauca*) comes from the extreme northern edge of the Douglas fir zone. Collections are under way in the Snowy Mountains, Little Belt Mountains, Bear Paw Mountains, east slope of northern Rocky Mountains in Glacier and Teton counties and southern Alberta. Price, \$5.00 per pound.

Pseudotsuga taxifolia caesia is collected in the Shuswap Lake district in British Columbia. This is fairly hardy and a faster grower than the above variety. It is ideal for Christmas tree plantations. Price \$3.75 per pound.

BLUE ENGELMANN SPRUCE

(*Picea Engelmannii glauca*)

Our seed comes from the fine trees on the eastern slopes of the northern Rocky Mountains along the Montana-Alberta border. The trees are narrow and compact and color is equal to Colorado Blue spruce. Price is \$5.00 per pound.

ALBERTA WHITE SPRUCE

(*Picea albertiana glauca*)

Collections have started near Lesser Slave Lake, Alberta, Canada. We believe the trees are outstanding for compactness and color and are certain to be hardier than anything ever offered to the trade. Price, \$8.00 per pound.
